Drawing

Games

Music

Movies /  
TV Shows

## PROFILE

“ I am 17 years old and study Software Developer Games at the Noorderpoort College in Groningen. Since my first year of study, I have participated in the annual Global Game Jam, which was very fun and educational. During this event I gained a lot of inspiration and met new people who find game development just as interesting as I do. I have learned a lot in recent years and would like to apply everything I have learned in practice. I am looking for an internship where I can learn more and expand my skills. ”
